MSIS

Multisensor Stabilized Integrated System

Day and Night IR Surveillance and Target Acquisition and Recognition, Passive Target Tracking and Accurate Fire Control

MSIS High Performance and Unique Features

- **MSIS** is a fully stabilized electro-optic day and night surveillance target tracker for fire control systems.
- **MSIS** is in service with the navies and paramilitary forces world wide.

All in Light-Weight, Low-Cost, Fully Stabilized System with Proven Performance

- **MSIS** cost effectiveness offers the technological features of the most advanced systems at a much lighter weight and lower cost.
- The fully stabilized and ruggedized system performs at harsh sea environments. The turret provides high wind resistance, enabling the sensors to obtain a picture with superb resolution and outstanding recognition ranges, while ensuring excellent tracking accuracy.

MSIS

Multisensor Stabilized Integrated System

Technical Data

- Day-Channel B/W, color (optional)
- FLIR interchangeability, e.g., 2nd Generation FLIR 8-12µm or 3-5µm matrix FLIR
- High rate laser rangefinder, eyesafe (optional)
- Laser Designator (optional)
- MIL-STD-1553 BUS interface/RS422
- Improved tracker

Note: Parameters may be altered to comply with customer specifications. ELOP - Electro-Optics Industries Ltd., reserves the right to make such alterations in design, specifications, specifications, and manufacturing to assure optimal quality improvement.
